

# The foaming solution to remove organic pollution?

## THE POWER OF DISINFECTION START CLEANING

In order to remove stubborn dirt and organic material, for example as plant juices, using an optimally formulated cleaning agent such as Intra Clean Organics is essential to ensure optimal biosecurity.

Intra Clean Organics produces a stable foam upon application, which is important in reaching all the hiding spots of the organic material.

## 5 REASONS TO CHOOSE INTRA CLEAN ORGANICS

- ✓ Formulated for heavy duty cleaning of greenhouse equipment
- ✓ Fast and powerful removal of pollution by multiple mechanisms of action
- ✓ Superior foam production for maximum contact time
- ✓ Deep Clean Technology for the detachment of pollution
- ✓ Effective removal of plant rests, algae and organic dirt

Effective cleaning  
removes **99.9%** of  
microorganisms

A foam adheres better  
to vertical surfaces and  
**INCREASES**  
contact time

**NON-CORROSIVE**  
and safe for hardware  
and equipment

PROPER CLEANING CONTRIBUTES TO SUSTAINABLE GREENHOUSE PRODUCTION

Intra Clean Organics is part of  
the Intra Hygiene program for  
future proof growing
